

CAREER SUMMARY

IT Support Specialist with a unique blend of hands-on experience in embedded systems and enterprise IT. Adept at diagnosing and resolving intricate hardware and software issues, leveraging expertise in low level networking configuration, embedded Linux, and hardware-software integration to drive efficient solutions.

SKILLS & QUALIFICATIONS

- **Certifications:** CompTIA Tech+, Google IT Support, Google IT Automation with Python, Google Cybersecurity
- **Technical Skills:** Windows and Linux based Infrastructure, Linux CLI, macOS, Microsoft Office Suite, Calibration & Upkeep, Active Directory
- **Software Skills:** Proficient in git, gitlab, Arduino IDE, VS code, I2C protocol, EasyEDA, Docker, Slack, Zoom, Jira
- **Programming Skills:** C++, Javascript, Python, Node.js, C#, SQL, R
- **Soft Skills:** Project Organization, Technical Writing, Strong Communication

PROFESSIONAL EXPERIENCE

Operations & Systems Engineer

Jan. 2024 – Aug. 2025

[BallyBots](#); Livermore, CA

- Created a low cost Robotics education kit for ages 12+ that introduces edge-AI & real-time video streaming to schools
- Tested prototype PCBs for issues with Test Environment of Multi-meters, Power Supply and Traffic Generators
- Engineered a ESP32-based robot with real-time video streaming, sensor/motor integration and UART, SPI, and USB protocols for local communication/flashing
- Maintained Business operations for the company, handling order negotiation, ensuring quality & compliance support
- Achieved a 90% first-contact resolution rate in customer service fixing issues end users had with the product

Systems Engineer

Jul. 2023 – Jan. 2024

[Vanet Inc.](#); Rancho Santa Margarita, CA

- Configured and optimized WiFi 7 routers, implementing prototype routing protocols (similar to OLSR) for proprietary software
- Wrote and modified Bash test scripts to validate software performance across multiple concurrent WiFi networks
- Designed custom kernel modules and WiFi 7 mesh networks, reducing latency by 30% through protocol enhancements
- Engaged team members on networking best practices and version control with Git, improving team efficiency.
- Implemented and tested custom kernel modules on router hardware, managing OS and firmware update cycles
- Debugged WiFi scanning programs using WPA_Supplicant and netfilter modules

Junior Engineer

Feb. 2021 – Jan. 2022

[Saffron Rose Corp](#); Livermore, CA

- Created lightfield capture program using python and GCode to be used on modified 3D printers
- Trained Tensorflow proof of concept neural network in how to identify saffron flower pistils for future harvest with 80% accuracy
- Collaborated in a small startup team, conducting regular project budget reviews and COGS analysis to identify cost-saving opportunities and ensure financial viability.

HANDS-ON VIRTUAL LABS AND PROJECTS

[SLAM3R 3D Reconstruction](#)

Jan. 2025 – Feb. 2025

- Modified in development python repository to work with alternate hardware
- Fixed bugs and corrected data from libraries that convert images to accurate 3D point cloud

[Inbrowser Head Tracking Demo](#)

Jan. 2023 – Feb. 2023

- Combined OpenCV webassembly with GDscript using Godot Game engine Javascript Bridge
- Implemented real time head tracking to in game camera frustum offset for realistic perspective warping

[XOR BackProp Neural Network](#)

Dec. 2020 – Dec. 2020

- Built with Deep Neural Network from Vanilla Javascript to run in browser
- Created custom tensor math library, with additional gradient descent & backpropagation algorithms

EDUCATION

IT Support Specialist Program

Aug. 2025 – Dec. 2025

NPower; San Jose, CA

Relevant Coursework: Completed coursework in 18-week, 300+ hours receiving hands-on technical Information Technology training and microprojects in a cohort-learning environment. This program's IT instruction is centered on CompTIA's Tech+, Microsoft Azure & Google IT Support certifications.
